

VoiceCompact™

■ CATCH THE MESSAGE!..

VoiceCompact can be used in a thousands of different applications: recording the information when you are driving, walking, talking - just push the button.

It is not a tape recorder but there is a demand for a tiny simple inexpensive device that can CATCH THE MESSAGE anywhere, anytime ...

It is a nice present, funny toy, useful friend...

Just Push The Button:

1

You are lost in the unknown place, you stop by the gas station and ask for directions. Will you remember everything the guy told you? Just push the button and record whatever you need to remember and VoiceCompact will remind you later.

Record telephone numbers, directions, information's from anybody anytime and don't bother searching for a pencil and a scrap of paper. Record your wife's instructions when you go shopping, catch a funny joke not to loose it before you get home... Record from any telephone DTMF sequences of telephone numbers or access codes and playback later as an addition to the full number or as a full number, full security from calling card number grabbers...

2

You are driving the car and enjoying your favorite radio station. Suddenly the commercial interrupts music and you hear the important information you need. The telephone number will follow in a second... Just push the button! You got it!

Record radio messages when you are listening car radio or somebody gave you a joke and you don't want to loose it. Play back the message immediately as many times as you want - just push the button once and listen the message, push again and listen another message (for multiple messages system).

3

You are learning foreign language and need to repeat thousand times for pronunciation purposes - it is VoiceCompact ! Push the button for record, push the button for playback, as many times as you want...

4

Your battery is dead - do not worry! VoiceCompact will remember information for 100 years without any power!

It is so small that you can carry it anywhere, it is so simple that even five years old kid can use it - no manuals, no rules:
just push the button and you can't be wrong!..
